Title:

Comments: This project will increase traffic and traffic accidents along highway 83. The volume of visitors to the area will increase the volume of emergencies (medical or otherwise). The volunteer fire department and first responders in the immediate area, as well as the surrounding areas, will be stretched thin and could have increased response times. The size of the resort at Holland Lake Lodge should be reconsidered and reduced to meet the availability and respond-ability of the local volunteer fire department. There is no regularly manned and paid fire departments within more than an 1.5-hour response time. Additionally, there is not enough law enforcement to respond in a reasonable time frame to the site. Tax payers should not have to pay to increase the number of officers so that a multi-million (or multi-billion) dollar company can make more money.
