Comments: Why isn't this unneeded project getting a full EIS? This project will create a major loss to the surrounding areas impacting everyone that is trying to have a peaceful camping experience close to it.

This reeks of someone getting compensation for approval. As a public employee you have to go the extra mile to ensure public property and monies are used wisely with no special consideration to special interest groups. When you do something like this your good name and public trust are forever lost. This doesn't pass any sniff test. Full disclosure and environment impact analysis needs to be done with a proper public notice disclosure. If it's such a great project it should have no problem going through the process. The amount of sewage produced next to the lake is a huge concern to water quality. Who's going to pay for the maintenance and repair to the road from the increase in traffic, including snow removal? Better not be the tax payer. This is not compatible with the historical use of the area.

Destroying historical public property to enrich a few is never in the public interest. This project needs to be denied.
