Comments: It just seems awfully shady how Powdr and the Forest Service are pushing this through so quickly with no environmental studies, no impact studies, etc. Yes, I can see that the lodge and other buildings need some updating but we don't need 200 trees cut down and 32+ buildings covering the shoreline. We are up here for the peace and quiet and serenity of this area of Montana. We don't want or need some big, money-hungry corporation taking over Holland Lake Lodge. Where are the results of studies of the extra garbage, the sewer, the impact on the wildlife? This has all been hush-hush until September 1st. Now all parties involved need to be held accountable.
