Title:

Comments: Montana the Last Best Place, let's keep it that way. We need to stop looking at the money to be made with this project and look at all we can and will loose. Our natural wildlife habitat, and infrastructure problem for waste, litter for the lake and danger for the wildlife and fish and others that use the pristine waters of this quaint lake. We dont want commercialization of our land or our natural resources. They are ours. Go build your corporate vacation place in your own state and leave our natural beauty alone. Development = loss of control and larger problems than one can imagine.
