Comments: I proposed to my wife at Holland Lake Falls. I fought fire for the crew based in Condon. I have recreated in this area for many years... Exploiting this area, removing historical structures and developing this area for the wealthy goes against everything we hold dear as residents and folks who put the environment, local logistics and the landscape first.

As a resident in a small town in MT that is a major access to YNP, I can tell you that high priced vehicles, loaded with people who are loaded (both monetarily and oftentimes with substance) will only put stress on the local communities, wildlife that use HWY 83 as a corridor and disrupt the pristine waters of Holland Lake.

Sure, the higher volume of traffic will undoubtedly bring revenue to this area/the state however, this is a short-sighted gain.

Please, please do not allow this proposal to go through!

Respectfully,

A concerned resident of MT.
