Comments: Holland Lake will forever be changed if a massive structure is built. You will pollute the lake, kill the fish and wildlife and take away from the natural rustic beauty that is Holland Lake. How absurd and greedy this whole concept is and for what? So people with too much money can vacation in the "wilderness" There will nothing wild about it once this development is built. It will just be another vacation destination with a lake. What makes places like this so special is their remoteness. The idea of building such a massive structure on this tiny lake is ridiculous and makes zero sense. Can we please put the environment first?
