Comments: I am opposed to the planned build at Holland Lake. This build is beyond unnecessary. Any statements from the FS or developer as to how this will improve the quality of life for the area, aka: what is the need ? Just because you can do something doesn't always mean you should (or be allowed to). Where is this mega facility going to draw it's water? Where will their septic go ? Where is their environmental impact (aka: quality of life for the environment) study? Why is this fast tracked ? Are the county commissioner's aware of this project ? Yes, this might be FS land, but this project will affect the surrounding area for miles. This place isn't being built for Montanans, think "Paws Up" where locals DON'T go because its very expensive. Did the FS think to include the stake holders ie: Montanas in their decision making process ? How about an open meeting to accept public comment ? This project will NOT create many jobs for the locals, again think Paws Up and their seasonal out of state employees. Not good FS, not good.
