Comments: As a born and raised Montanan, seeing my home state and wild lands be repeatedly sold and developed into parking lots, resorts, and activities for wealthy people who don't even live here breaks my heart. You can hardly go anywhere anymore to enjoy nature without seeing huge amounts of people. The proposed holland lake development will ruin the glory and beauty that holland lake is. 32 buildings on 15 acres? Parking lots, a restaurant? Where are the woods going to be.? This will trash the lake and ruin the ecosystem and kill another gorgeous area of our great state and turn it into something commercial.

I wholeheartedly do not think the forest service should sell this land to the Powdr developers

We are well on the way to not having any montana left. How can we protect and conserve our woodlands if the forest service is willing to sell us out?
