Comments: While I feel the operations of the existing historic Holland Lake lodge should be allowed to continue, the expansion and development of this lake and area would have a large negative impact on the area in many ways, but most of all, how many of these undeveloped lakes and forests are left? Another corporate modern development is not needed or in the interest of the area, it's people, or it's visitors. Please leave it alone and find someone to care for and maintain the historic lodge, not develop it.
