First name: Patricia

Last name: Watson

Organization:

Title:

Comments: National Forest Services,

Montana is a unique and extraordinary place to visit. The miles of trails and escape from our everyday hectic lives is what makes Montana so special. This project seems to want to change Montana into something very different.

I ask you all to reconsider your approval for such a project, as it will GREATLY impact the surroundings of this most beautiful pristine place.

Montana is special and unique, that's why people visit and live there!

Respectfully submitted,

Patricia Watson
