Comments: I am a fourth generation Montanan and this proposal infuriates me to no end. Montana is being raped and and pillaged by out of state companies and new comers. They destroy the natural beauty of our beloved state. They have destroyed their own state for the almighty dollar and now turn their eyes to our state, cutting off access to native Montanans who have been here for generations. This type of thing has been happening all over our state, will we have another billionaires club blocking locals and visitors to enjoy the natural beauty of our state? Where will it end? One of Montana's mottos is the last best place, put an end to this horrible project so the integrity of Montana will stand for generations to come and truly deserve the motto of 'The Last Best Place.'

Thank you for your consideration.
