Title:

Comments: Montana is my home even though I'm not living there now. I soon will be. This project is not for Montana and the people who love her just like she is, don't want it. The project will cause pollution and bring in unwanted attractions that are not needed and will affect the environment, change it, pollute it and forever destroy that part of Montana. This project is not necessary!!! If you don't think it will do the things I have just said, look no further than the pollution that Big Sky has brought to the Gallatin River. Sewage, blue/green algae.
