Comments: Hello. I am not a Montana resident, but I am stationed here in the United States Air Force. I love the state how it is and I do not want it to change. I am originally from Colorado and the changes that Colorado is going through is not what I want to see happen to Montana. I feel this project would take away from what Montana is and how it should stay. We do not need fiber optic Internet to a recreation site that is in the woods. There are plenty of large cities for high-speed Internet, or any Internet for that matter. I fully object to this project and any other project like it to make the forest into a rural area. Keep Montana beautiful and not like California.
