Title:

Comments: As a forest service employee representing the Lolo, I beg anyone with the power to stop this project from moving forward to act quickly and deliberately. Projects like the one proposed at Holland lake will do nothing but decrease the aspects of that lake that make it special. This will do only harm, and the public WILL RESENT US for allowing this to happen. Nobody wants this. Not locals, not forest service employees, not the public, not the plants and animals that call Holland lake home
