Comments: Haven't we torn up enough wild spaces? Developing Holland lake does nothing for the public good and it hurts the public's access to wild spaces. Ruining another pristine spot by letting developers tear it up so a small fraction of the public can have vacation homes they hardly use is greedy. Please find a better way to earn money for whatever it is you need. Selling off land here isn't good for the public, it isn't good for wildlife, it's a bad idea.
