Comments: I am against any development whatsoever on Forest Service Land anywhere, but especially around Holland Lake. This is pristine land that Montana is known for and also represents a way of life. It is also wildlife habitat that must not be destroyed. If you give the large greedy corporations an inch of leeway, the next time you turn around the entire state will fall victim in the same manner. It's simply greedy corporate doctrine that we locals and our heirs will be paying for forever and not just in monetary terms. Please do not allow the development around Holland Lake, nor on any Forest Service Land in Montana.
