Comments: Why is this project so sudden and without any environmental review.? Please leave it the way it is. Been. Going there for years. People that live here cannot afford one of your leases for a sliver of land on a lake but if you have enough money it appears you can " push" a project through like this with no problem. Holland lake will never look the same as generations have known it. Please listen to the people that have paid your wages for years that love and nurture our wonderful lands.
