Comments: I strongly oppose the development plan as proposed. Too many places in MT, especially in Western MT, have become inaccessible to people that live here due to overdevelopment catered to people with wages that we can't compete with. This is another prime example that will create low wage jobs that we already cant fill because the cost of living and housing has risen so dramatically in comparison with wages. There are "help wanted" signs literally everywhere because people cant live on those wages. In addition, the increased traffic and influx of people this would invite will destroy the wildlife haven that is currently Holland Lake. Please consider Montanans before proceeding with another ill-advised venture that will only hurt the folks that live here.
