Comments: I beg and plead with you to please stop this project people that have been born and raised here are watching it crumble before they're very eyes. It seems as if it is being glorified in Hollywood therefore attracting the wrong types of people who only want to capitalize on Montana's beauty instead of preserve it. Montana is one of the final frontiers we're giving out 50 plus thousand out of state hunting permits pushing the actual locals who provide for their family and aren't just looking for a trophy out of hunting because it's next to impossible these days. People are buying our properties sight unseen at unseemly prices and pushing out locals and making it impossible for people to survive here even though this is where they were born and raised. Projects like this will not help Montana it will only turn Montana into every other state that is overran overpopulated with people who have zero respect for their fellow man or the god-given mother earth that we all so enjoy. Please I beg of you reconsider do not allow this project to continue.
