Comments: It has come to my attention that a massive building project by the POWDR corporation has been slated for Holland Lake. I am truly dismayed by this proposal. The US Forest Service is not in the business of selling off our public lands for the use of the privileged and wealthy. Public lands are for everyone not just the rich and powerful. Holland lake and the surrounding area cannot sustain the impact of a project this massive and detrimental. I am sure there are plenty of opportunities for the POWDR corporation to expand in Colorado. I can only think that they have chosen Montana because they think they can buy up our land without a fight. I, and many like me, insist that the forest service denies this application.

Tell POWDR to take their greed elsewhere.

Sincerely,

Geoffrey Posner
