Title:

Comments: I completely oppose this expansion and the risks to the surrounding public lands and wilderness areas. If Montana natives wanted this to occur we would've done it decades ago however we realized long ago the importance of preserving pristine areas around these special places. Once these areas are expanded, they spread and damage surrounding areas. The Flathead Valley has been preserved for good reason, to protect public lands and allow access to all people instead of allowing only a few to profit off what we have preserved.

NO to this expansion.
