Comments: There is already plenty of development here. If you keep allowing projects like this based on money, there will be no Montana left.. At some point before it's too late, one must realize that enough is enough.. once you destroy the natural beauty and serenity of an area; you can't ever get it back... Another thing is how can this get fast tracked the way it has??? Kinda raises huge flags... Environmental studies?? Public forums.. money talks I guess, wildlife, nature and locals have zero input.. sad times we live in..
