Comments: One of the reasons I love living in Montana is the fact that nature is open to everyone to enjoy. Majority of the land is not privatized. Please don't allow the Park City company to move in and privatize our state. It bothers me that only "rich people" can obtain and enjoy our state. Everyone should be able to.

I remember as a teenager, Park City being a small skiing Utah town and seeing a few homes and cabins nestled in the mountains. Now it's a "for the rich" development nightmare. We can't let that happen here!
