Comments: This project will have negative impact on the biodiversity of Holland Lake and Swan Valley.

Upgrading the lodge per suggested proposal will not only contribute to the depletion of our forests and water but also generate wastes and pollute the environment.

For me, Holland Lake has been one of the tranquil places to come and reflect. I enjoy the magical hike to the falls, identify numerous Rocky Mountain wild flowers, observe chipmunks at their play, and feel the awe when staring at the magnificent views of our mother nature. Despite the rushing falls, Holland Lake is one of the serene places that make me realize: I am proud to be Montanan!

With such huge upgrades to the lodge, how can you preserve our forest lands of Montana?!

I am fully opposed to this project.
