Title:

Comments: I would first like to thank the US National Forest for letting the public comment on issues such as this and others. As an advocate for public lands in access I oppose a development project on Holland lake. As old and new montanans navigate the development of our wild places we need to tread lightly. The current Lodge fits into The Rustic backdrop of the Seely Swan mountain range. It would be a travesty to listen to loons and bugling Elk while looking across the lake at a modern cabin complex and welcome center. With the modernization of a Lakefront would come noise pollution, light pollution, and potential user conflict and overcrowding on the lake. So in closing I would like to say it is easier to tear something down then keep the Integrity of something historic.
