Title:

Comments: Im writing this as a request to stop the changes at Holland Lake. This is a beautiful jewel that is an important part of Montana. I've been going to this lake for 45 years. I introduced my kids to the beauty of the lake and falls. If you allow this expansion you will definitely cause undue stress on the pristine environment that surrounds the current lodge. I truly believe you will compromise the natural beauty of the lake, the wildlife, Loons, beavers, bears will all be effected by the increase of human traffic.

I understand the developers desire to upgrade the existing lodge but can that small of an area sustain the large increase the developers want and not damage the foliage and wildlife?

As a Montana native this area is one of the last best places in Montana. Please don't ruin it like you have ruined Glacier National Park.

Sincerely Julia Christian

Very concerned citizen.
