Comments: Holland Lake has been the gathering place of our family for 3 generations each summer. Year by year it has been harder and harder to get into the campgrounds. It already has to many people. Adding more cabins, the lodge, a restaurant will put a terrible strain on the already overloaded area. We are generational visitors but the impact on local residents will be great. I do not think an out of state company should come in and take away all that is near and dear to so many people. Yes we would like to share the beauty of this lake and area with others but the bottom line is that it cannot take in any more people.
