Comments: First, let me thank the US Forest Service for allowing public comment.

With that said, there shouldn't have to be any public comment outside tge swan valley. These people live in and around the Holland lake area. Ask them, guarantee the response will be 90 - 10 against this terrible plan. Who in the US Forest Circus Approved this? Who feom the federal government working on this project FIRST asked the people of Montana of we thought thos was a good idea? You Approved the sale and plan, then ask for comment? Another prime example miss management by the federal entity in an area that directly affects the residents of a state.

PLEASE, do NOT allow thos to happen.
