Title:

Comments: As a resident of this state for over 20 years, I feel physically ill reading this. I have watched my beloved state skyrocket in the cost of living, due to things like this coming in. If I hadn't already owned a home, I couldn't afford one now, and nor can my loved ones. Many of us have to work 2-3 jobs due to large corporations coming in and selling the idea that Montana is a tourist State for those who want to buy and built their Summer homes here. These companies turn every beautiful piece of land into ski resorts, and Summer getaways and make it nearly impossible for those of us who actually reside here to enjoy our beautiful state. To get a camping reservation you have to book a year in advance or more now at Holland lake and many other parts of the state. I can't even have access to the very state I live in because I'm being told that those with the greater profit margin have the say. Well today I have that say, and I say this needs to stop. We are losing the very heart of what makes Montana so great in its untouched land, that's easily accessible by ALL, not only those who can afford it.
