Title:

Comments: I am a 4th generation Montanan. My children can not afford to live here, in the Flathead Valley. I realize that this may be economically beneficial to the State, but that rarely reaches out to benefit the people who have lived here before it became 'the place to be'. Generational fishing holes, hunting access, and dirt roads have been boarded up, blocked, and gated for those that spend very little time here and have no community ties. Most could care less to assimilate to the type of lives that we cherish. Don't sell our State out from under us. Thank you.
