Comments: I do not want this land to be purchased by a company and have the historic landmarks of Montana torn down. I have been a resident of the state of Montana my entire life. In my experience, out of state people come here with money that they made in a state where the economy is much more inflated than it is in Montana. Their money goes a lot further than the money Montanans earn in their own state. This inflates our economy, gentrifies neighborhoods, and leaves Montanans at a a heartbreakingly unfair disadvantage. Additionally, Montana is special because of the amount of public lands available to its citizens and tourists. Please do not take more of them away. Please do what is right. Montanans deserve better.
