Comments: I am writing in protest of the POWDR project on Holland Lake. First, where is the transparency to the tax paying citizens of our great state??? This is not a decision in the category of "exclusion" for the Forest Service to decide. The impact will reach further than the proposed 15 acres and create numerous, detrimental effects: more water usage, displacement of wildlife due to increased numbers of people, increased pollution (carbon, garbage, overused trails . . .). It will change the scope of the landscape forever.
