Comments: I feel building this "lodge facility" would not benefit Holland lake nor Montana whatsoever. These areas are not for but shot corporations to come in and make a resort out of it. It's going to ruin the ecological way of life in this area. The respect that people will lose/won't have when visiting the area will lead to diminishing value. We need to protect these wild areas and stop the commercialization of it. Growing up in Montana and learning to appreciate/respect the wilderness around me, it saddens me to see corporate/big shot American come in and try to take it away. We need to protect all these beautiful areas including holland lake. I say vote NO in allowing this facility to be built. For past, present, and hopefully future generations to come can enjoy holland lake the way I did growing up.
