Comments: I was born and raised in Montana and until year ago I lived there I moved to Salt Lake City Utah which is just next to Park city Utah. I'm telling you the garbage in this place is awful the water is awful what they do to the environment is awful please please please do not let them build I understand it could be a bonus for the tourism and bringing money into Montana but the damage it will have on our ecosystem and our way of life and our land is a miserable they don't care about it. I have seen a progression of tourism and city people moving into our beautiful state I have seen an increase in garbage vandalism etc. come to alarming amounts for Montana lakes that nobody knew of when I was a kid now I have garbage all over the place I genuinely fear Montana will become like this if we keep letting people build in places that should be protected please do not let them do this
