Last name: Blomquist

Organization:

Title:

Comments: Ha! ... "The Forest Service values public participation" ... the opening line states ... while fast tracking a hot mess! Way to go Forest Service ... someone's getting rich on this project and spoiling nature in the process. Your organization is no longer fit for purpose if a project of this sort of ecologically impacting magnitude is fast tracked with essentially no public comment period. Please re-consider ... moving forward with this ostentatious initiative is not the way!
