Comments: I have concerns about such an improvement project. Typically when such projects are undertaken they benefit the wealthy and out of state visitors. What is being done to ensure that any improvements are not exploitative of Montana public lands and heritage? What is being done to ensure that any such projects improve access for local and regular Montanans who don't have the money to rent fancy facilities? Please don't turn Montana public lands and resources into a playground for wealthy out of stators.
