Title:

Comments: I disagree with what this company plans to do. Forest service land is to available to all to enjoy the quietness nature. Not to be used for those who want to want to abuse it to make a quick dollar. They would ruin so much of the land by adding so much asphalt and concrete and buildings that the land would no longer retain its wonder and Beauty. To make this a tourist destination would ruin more than just the land they lease. More traffic on that plot means more traffic to the surrounding areas. More people being disrespectful to the land, more garbage left in the woods, more random trails everywhere, etc. I urge you to please not a approve this and keep this area smaller scale for those who wish to truly enjoy nature and see some amazing historical sites. Thank you for your time.
