First name: Thyler

Last name: Darrah

Organization:

Title:

Comments: My name is Thyler Darrah and I have lived here in Montana my entire 25 years of life. I have been lucky enough to enjoy so many of the outdoor recreational activities throughout my life here, including Holland Lake. While I do realize there is currently a small lodge and things like that on the property, a large out of state corporation building, a new luxury spot to stay that no one here can clearly afford? Come on. Not to mention, This is a prime example of keeping the wild... wild. Every bit of construction and disruption caused around this lake will be an ecological disruption to the world around it. As someone who's father worked as a game warden captain of 26 years, I understand more than anyone what it means to protect our public lands. Please consider the detrimental effects this will on the surrounding areas ecosystem as well as the affect this is going to have on local inflation and ruining the small town some are used to calling their summer home.
