Comments: I definitely object to this. We are literally giving away everything that makes Montana a special place, the last best place, away out of PURE GREED. Once these places are gone...they are gone. I for one am sick and tired as a Montana resident from birth seeing our state bought up and turned into California. If California was so great then stay there. Theyy and many of these other out of staters moving in and buying up everything already ruined their own stste. Let's not allow them to ruin ours. The forest Service should do right by what they are supposed to stand for in keeping lands like this as it is. We don't need another overpriced resort that takes away all of the natural beauty Montana has to offer just so some big corporation can line their own pockets. The state never seems to benefit from all of these out of state and out of country entities using our lands for their profits either. So I absolutely object to the forest service allowing this to happen on that beautiful piece of land and lake.
