Comments: They bank erosion and newly formed trails off the falls trail have been substantially increased in the past four years. My husband and I consistently pick up trash and even see human waste by the falls.. adding 120-150 people more per weekend is crazy and would only diminish the natural beauty and erode the lakeshore more.. the lane beneath the lodge is public and must be kept for the benefit of the people NOT just people who need luxury and pampering and can afford this new planned project!! Go to flathead lake which can tolerate more visitors due to the sheer size of the lakeshore!! This is not a project that benefits the people of Montana.
