Comments: In regards to the proposed facility improvement at Holland Lake Lodge and the surrounding area, I would like to voice my concern. Holland lake and the surrounding area has remained a quiet and quaint escape for many Montanans and tourists alike. The campground and swimming area are a little oasis for people to enjoy nature the way it is meant to be enjoyed.

While I am not against making upgrades to facilities, I do think that this proposal is way too far in the other direction focused on capitalistic gain instead of protecting our land. This quiet little lake will become overrun with people as it is already crowded as it is. I am against the construction of a large restaurant and lodge at Holland Lake.

Also, this lake is a nesting grounds for the Common Loon which is a species of concern in the state of Montana. Bringing more hikers and boaters to this area can only be detrimental to the species.
