Comments: I am merely a citizen, and outdoorsman. I voice my opposition to this development because too often, development has altered the landscape of what once was incredible natural beauty. In addition, development has destroyed critical wildlife habitat, even causing the eventual endangerment and extinction of various species. For this place in particular, it is one of the last truly wild places in America, and although there historically has been human presence here, that presence has been benign and not destructive. This development would be destructive in the manner I described above. Many would complain about the aesthetics, and they would not be wrong, but that aside, there are many other ways and places to have a wilderness resort in the area without being in such close proximity to the lake. I urge the Government to pay extra close attention to the endangered species habitat issue. Overall, I urge the Government to deny this plan. Thank you for doing what you can to protect America's beautiful places.
