Comments: I have been in Montana my whole life born and raised in Stevensville. Now I currently work as a UPS driver in a very rural part of the state out near Alberton/ Fish creek. When places out of state come in and try to "California " our MT it takes away so much of what makes Montana so special. I support having jobs for more and improving our home but this is not that. Taking a place like Holland Lake , truly a treasured area , and making it a resort? Is just adding more a divide to those who value Montana and those whose want to just exploit it. Please vote against this. We need to protect our state not just put it for sale and push the locals out.
