Comments: I am writing to state my state my objection to this project moving forward without a complete environmental environmental assessment and environmental impact impact study.

While it may be true that the new building does not change tzzhe use of the site in the broadest possible sense, It's like arguing that Because they are both recreational amusement sites, Disneyland and a putt putt mini golf course are equivalent. There is no way to argue that a development of the scale proposed would not change the site irrevocably and not for the better. Indeed, I would be skeptical as to whether a development like the existing Holland lake lodge would be approved today if we were starting from we were starting from an untouched an untouched landscape.
