Title:

Comments: PLEASE do not proceed with this project. Leave the land and surroundings as is. There are already enough beautifully developed areas for folks to go. The last thing we need is for our natural resources and beauty to be turned into a heinous crop of buildings, condos, people coming that come to use and abuse the landscape rather than appreciate it and all it does for all of us.

I'm in Vermont. I've been to Montana a few times. I love it there, it's like our own landscape in the natural beauty. Please do not let greed ruin this place for generations to come. Think about it, it's not needed, it's not necessary, it's greed, someone is looking to make money. Put in more hiking and biking trails if you have money to burn. Help the local communities who are slammed from the lasting affects of what Covid did to so many losing jobs and careers. Stop this madness, please! Think it through. It's not right on too many levels.
