Comments: I have been a resident of Montana all my life and it makes me sad and disgusted when out of states and big corporations decide that they should come in and destroy what is known to all Montanans as the last best place. They're destroying historical places that have a lot of meaning and a lot of history and it's disgusting that they think that no one would care. I can see in the future a Montana that does not look like Montana were all the big corporations and all the Multi millionaires come in and change everything Montana is known for and everyone loves. Make the difference today and don't pass this bill don't let them come in and make this lake into something it should not be there's already lakes in Montana that people cannot afford to go see because they can't afford to do anything there. Don't give the big corporations what they want keep Montana as it is, keep it the last best place and vote no for this bill.
