Title:

Comments: I am so sick and tired and downright disgusted with these out-of-staters taking notice of our beautiful Big Sky Country and trying to take it, change it, and find a way to make a profit for themselves. There is a reason we are called the Last Best Place and as usual, the greedy and selfish individuals of the human race want nothing more than to destroy it for their own monetary benefit. We have already lost too much of our home to wealthy out-of-staters -- this has to stop, the line needs to be drawn here.
