Comments: Holland lake has been a hidden treasure for decades. One of the only places like this on the state where you don't hear loud cars, lots of boats, resort like negativity. Holland lake is a special place for locals. It needs to stay that way. The state is already making millions down in the Big Sky area which has ruined that part of the state. Many locals don't even consider big sky/Bozeman as part of the state anymore. It has changed to cater the rich out of states. We do not want this to happen with such a peaceful and tranquil place that some of us call home. Keep Holland Lake the same as it is, protect the ecosystem and wildlife that use that as a nesting, feeding, and breeding ground. Montana has seen enough wildlife being impacted because of the greedy and selfish rich. PROTECT IT! Quit allowing these companies to come into OUR state and make it how they want it and ruining our beautiful lands and pushing the locals out, and pushing the wildlife out. Let Montana's keep something that is ours and let us enjoy what is left of OUR state and OUR home!! This state needs to stop catering to the rich and start listening to the locals and natives.
