Comments: I believe the exploitation of Holland Lake is inappropriate. If you start leasing public land to private property owners and/or developers and allow them to reshape the areas into corporations, there will be no Montana left. My husband and I live near public land. We chose our home because we're so near to a beautiful area meant to stay wild. We do not want our lovely area ruined by greed. Stop leasing PUBLIC land to private investors! It's wrong. If this starts, where will it stop?
