Comments: I am writing out of concern but concern for what I understand is going to be a wealthy purchase Of property at Holland lake for the purpose of commercialization and resort living. I further understand that Holland lake is a pristine Montana Attraction attraction that has luster in the current status.. Yes I understand improvements can be made, however to bring in a commercialized, industrialized, resort and via resort environment With which only the wealthy can afford to Kenneth Ford, is the wrong way to go about anything with this lake and environment. This Valley cannot handle the potential traffic problems associated with a commercialized resorthe commercialized result. I personally as a Montana native native disagree with this activity and ask that you guys not allow it or approve it in any way shape or form. Small town Montana is not meant for big city resorts or resort living. It has ruined Big Sky for instance.

Thank you for offering me an opportunity to voice an opinion as a Montana native native resident for 40 years and and concerned citizen even though I live in Arizona.

Respectfully,

Matthew Davidson
